Validation — the setting of Figure 5.4 of Bach (2024): d = 40, Gaussian inputs, $\mu = R_x^2/n$ with $R_x^2 = \max_i \|x_i\|^2$; steps $1/R_x^2$ (GD) and $1/(4R_x^2)$ (SAGA) of the book's analysis, our SGD step $1/(R_x^2 + \mu t)$
